Re: Old Dominion Drive Phase II

Dear Mr. Cunningham and Judith Wheat:

As the Civic Association President and neighborhood representative for the Rock Springs neighborhood, you are receiving this letter to inform residents of an upcoming improvement project. Hopefully, post on your webpage and/or an upcoming newsletter. I will also be sending letter to residents with additional information.

Arlington County will soon start construction on the Old Dominion Drive Phase II project. The project includes installation of sidewalk, curb, gutter, street lights, traffic signals, storm water and water main upgrades, on Old Dominion Drive between North Glebe Road and 38th Street North. Construction will likely commence in April 2015 and last approximately 18 months.

Construction will be phased to limit impact on residents, and the County will take significant efforts to keep inconveniences at a minimum. Impacts to adjacent residences will include construction noise, traffic restrictions, and water service interruptions that may last a couple of hours at a time. Residents will be fully informed of specific impacts as each phase of construction is launched by the construction manager.

The construction manager for this project is Gerald Roberson. During construction he will be available onsite on a daily basis and can be reached at 571-220-1880. We value resident input as construction progresses and welcome feedback.

We appreciate your patience during construction for this long awaited project.

If you have any questions or require more information, please feel free to contact me at 703-228-3202.

Sincerely,

A handwritten signature in blue ink that reads "Elizabeth Logan Diggs".

Elizabeth Logan Diggs
